### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-12 and 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Loopstra (6,208,407).

Loopstra discloses in the abstract and Figures 1-7, a lithographic projection apparatus with a radiation system (LA), a first object table (MT) with a mask and a second object table (WT) with a substrate and a reference surface, a projection system for imaging an irradiated portion of the mask onto a substrate, a positioning system (Figure 3) a height mapping system (Fig. 2-8), a position measuring system and a controller.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2851

4. Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Loopstra et al. (Loopstra) (WO 99/28790) in view of Loopstra et al. (Loopstra) (US 5,969,441).

WO 99/28790 discloses in the abstract, Figures 1 and 5-8 and pages 10, 11 and 19-24, a lithographic projection apparatus with a radiation system (LA), a first object table (MT) with a mask and a second object table (WT) with a substrate and a reference surface, a projection system for imaging an irradiated portion of the mask onto a substrate, a height mapping system (Fig. 5-8), a position measuring system and a controller. However, WO 99/28790 does not disclose a positioning system for moving the second table from the exposure station to the measuring station. (US 5,969,441) discloses in Figures 1, 2 and 3, the positioning system. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to provide the positioning system of (US 5,969,441) to the invention of WO 99/28790 in order to increase the throughput by having an exposure station and a measuring station while measuring accurate height.

### ***Remarks***

Applicant argues that the measuring of the height in the cited references is completed with respect to a reference plane, whereas the present invention discloses measuring of the height relative to a "physical reference surface." As far as the examiner can ascertain, the reference plane in the prior arts is also physical reference surface.

**Conclusion**

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
